The Tokenator 2

Legendary Creature — Human Advisor R

Whenever The Tokenator attacks, you get two token counters. Then create a creature token with the color(s) and creature type of your choice. Its power and toughness are any combination equal to the number of token counters you have. *(For example, if you have four token counters, it can be 0/4, 1/3, 2/2, 3/1, or, if you're really sure, 4/0.)*
